Reminders

- Homework 6 is due next Wednesday
- Quiz 6 has been released on gradescope and is due Monday
- Quiz 5 Redo has been released on gradescope and is due Monday
- Essay is due next Wednesday
- New, updated Grade Matrix Assignment on gradescope

Bubble Sheet Explanation

Section		Note Grades are meaningless at this point (71-75, 100)		Marking Instructions		Example	
Date		For overall grade, if you have two circles, D is +, E is -. E.g. CD would be a C+, BE would be a B-		Be sure to completely fill in the appropriate bubble.		☒ A ☐ B ☐ C ☐ D ☐ E	
1	Week 0 Day 1	26	Week 8 Day 1	51	PS0	76	PS0 REDO

Discussion questions

- 12.3-2. Suppose that you construct a BST by repeatedly inserting distinct values into the tree. Argue that the number of nodes examined in searching for a value in the tree is 1 plus the number of nodes examined when the value was first inserted into the tree
- 13.1-7. Describe a red-black tree on n keys that realizes the largest possible ratio of red internal nodes to black internal nodes. What is this ratio? What tree has the smallest possible ratio and what is the ratio?
- 13.4-8. A node x is inserted into a red-black tree with RB-insert then immediately deleted with RB-delete. Is the resulting RB tree always the same as the initial tree?
- 13.2-3. See book

If Time

13.1-6. What is the largest number of internal nodes in a red-black tree with black-height k ? The smallest number?
